Entrepreneurship and startup ecosystem

~ Nisarg Padalia

“Don't worry about failure; you only have to be right once.” #startupindia

A startup is something that gives something different, unique and good to the world. Starting a startup and taking it forward adds a lot to the country's economy. Startups develop the capacity of people to become good people, rich and help the country.

In India all people want to do government jobs. But govt job vacancies are less and people taking exams for jobs are more. So not everyone gets a job. To remedy that, the Indian government has encouraged startups.

I have also started a startup under this Startup Ecosystem campaign of Government of India. This startup is on mushroom cultivation due to which we get many vitamins and also get relief from cancer.

An entrepreneur is someone who can overcome many difficulties and give something different to the world.

“DON'T BE A JOB SEEKER; BE A JOB CREATOR”

Government of India has made many different policies to bring our country forward and increase the country's economy. In which the Indian government allocates grants to startups to encourage them.

Student Startup and Innovation Policy

Education Department,
Government of Gujarat

Acknowledgement: I would like to express my gratitude to respected Principale and management of Shree M. & N. Virani Science College and My gratitude to head of the Biology department . I am also thankful to vedanat Knowledge system who helped us to be a part of Young and Entrepreneurial Era.

Student startup policy is very useful for students. Under this policy, the Government of India allocates grants ranging from 2 to 5 lakhs to students for their unique ideas. So he gets everything he needs for his startup.
